## ARI Magnifier Setup in Joomla 1.5

Posted by dstefanou - 2012/04/23 15:12

---

Dear Team,

Unfortunately I am very new Joomla user and I am sure you will agree that all your technical support is focused in new users.

I have installed ARI Magnifier module and I have Chosen type Single Image just to make it work. I have added the Original and Thumbnail image path as follows:

Original Image: images/stories/homepage\_lightbox/texas\_large.jpg

Thumbnail Image: images/stories/homepage\_lightbox/texas\_small.jpg

Now, I have added the following code in the article:

```
{arimagnify srcDir="/images/stories/homepage_lightbox/texas_large.jpg" includeSubDirs="true" thumbWidth="200" thumbHeight="300"}
```

...but I can see the above code instead of the pictures and the magnifier.

I do not know how to give you access and for this reason I would much appreciate if you could assist me to find a way out.

Many thanks in advance for your support.

P.S. I have added 2 screenshots for your review.

Kind Regards,  
Dimitris Stefanou

Hello,

Could you provide a link to a page where we can see described problem?

Regards,  
ARI Soft

Thank you for your reply.

Is the attached screenshot convenient for you? <http://www.ari-soft.com/images/fbfiles/files/TEST.doc>

It is the real web page.

Thank you

We need to see the problem so we can investigate it. A screenshot can't help in it.

Regards,  
ARI Soft

OK. Are you online so as to publish this page and send you the link?

I am afraid I cannot publish it as is for a lot of time.

Thank you in advance for your reply.

With Kind Regards,  
Dimitris
