
Float magnifier thumbnail in content

Posted by Amandarail - 2014/05/02 12:04

Am using the following in content:

```
{arimagnify activeType="singleimage" src="images/prodimages/NL10-Topsoill300.jpg" style="float: right; margin-left: 20px; margin-right: 20px;"}{/arimagnify}
```

Works alright, but doesn't right float. Any suggestions

Hello,

The extension shows magnifier window inside the image. Like on demo page. If you want to show zoom window outside an image, you can be interested in ARI Zoom extension.

Could you provide a link to a page where you use the code?

http://baileysofnorfolk.co.uk/index.php?option=com_content&view=category&layout=blog&id=19&Itemid=119

See first product 'norfolk topsoi', this has the magnifier on it, will do to all others on this page and other pages once sorted.

Thanks

Add the following CSS rule to a site template CSS file and clean browser's cache:

.item A.ari-magnify{float: right}
