
Cannot get Magnifier to work

Posted by inzid - 2014/06/03 22:40

Hi there,

Im having a few issues with getting the magnifier to work. Here is the website

<http://colmanweb.co.nz/websites/award-importingv2/index.php/maxxis-zilla>

Im trying to magnify the tyre image using the following code i read from another article

```
{arimagnify src="images/atv-products/product1/fullzilla-large.png" srcSmall="images/atv-products/product1/fullzilla-thumb.png" includeSubDirs="false" thumbWidth="200" thumbHeight="200"}
```

The image locations are below

Large - <http://colmanweb.co.nz/websites/award-importingv2/images/atv-products/product1/fullzilla-large.png>

Small - <http://colmanweb.co.nz/websites/award-importingv2/images/atv-products/product1/fullzilla-thumb.png>

Any help would be great - I dont mind giving out admin details.

Thanks

=====

Hello,

Could you provide a temporary access to your J! backend by email and specify where you use the plugin code (in article or other place)?

Regards,
ARI Soft

Hi there,

I have just sent an email.

Thanks
