## magnifier works... but doesn't work

Posted by jamesvreeken - 2010/11/10 07:08

---

go to <http://www.iaskate.com/>

near the bottom on the tabs I have set up a couple RokTabs.

arimagnify works on the first tab. but not the second tab... the third and forth tab do not have the code yet

why does it only work on the first tab????

---

Hello,

It doesn't work because you try to apply it for invisible items and the extension can get necessary size. We'll investigate possibility to improve the extension that it supports invisible items and try to provide update within 24 hours.

Regards,  
ARI Soft

also on virtuemart pages when I try and use arimagnifier I get weird results:

as seen here:

Weird image leftovers <http://www.iaskate.com/creep.html>
